APP REVIEW FOLLOW UP

Dear Reviewer,

Thank you for reviewing the early app submission of Echeveria, below I have prepared answers to the follow up questions you posed.

1. *Is your app restricted to users who are part of a single company? This may include users of the company's partners, employees, and contractors.*
   No, this app is intended for general public use.

2. *Is your app designed for use by a limited or specific group of companies?*
   No, it is not designed to be used by select companies. Any company may register an account with us, however, it is intended for individual, non-sponsored, non-private, use.

3. *What features in the app, if any, are intended for use by the general public?*
   All features are intended for use by the general public. Specifically this includes:
     i. Creating, joining, or leaving social groups
     ii. Friending or unfriending other users
     iii. Logging specific games and their associated data
     iv. Sharing game data, through raw statistics and indirect visualizations with groups and other users
     v. Browsing person game data, through raw statistics and indirect visualizations on a user's personal profile.

4. *How do users obtain an account?*
   All users first register a user object, then create an in-app profile, both of which take place on the login page. This page displays on the first launch of the app, and each time a user logs out. New users must first register a user object with an email and password, which, upon validation, will take them to a screen to create a profile in the app. All that information can be changed later, from the edit profile screen. For developer use, a user can register a user object with a designated API token, or login anonymously. Both, upon validation, will take that developer to the same profile creation screen as with an email sign up.

5. *Is there any paid content in the app and if so who pays for it? For example, do users pay for opening an account or using certain features in the app?*
   There is no paid content in the app. It is free to create, edit, and delete a profile. All features are unlocked for all users.

Thank you again for taking the time to review this app. If you have any further questions, please continue to reach out, and I will do my best to answer.

All the best,
Brian Masse
